Payment: \_\_\_\_\_

The Henry County Conservation District is offering cost share funds for spreading lime on land used for agriculture. The cost share is 50% not to exceed \$500.00 per landowner.

Lime shall be applied according to soil test recommendations

Soil test results and maps are required for field where lime is applied

After completing the practice, bring a map of the farm, soil test results, and receipts to the Henry County Conservation District office and payment will be approved at the next board meeting.

**Application of lime to be completed by February 1, 2023**

Cover Crops must be seeded at the recommended seeding rate by the University of Kentucky. For seeding rates, please review UK Publication ID-113 or contact Megan McCoun at the Henry County Extension Office 502-845-2811. Other cover crops will be considered on a case by case basis (for example: tillage radishes, turnips - must be planted according to UK's recommendations).

After planting a cover crop, please bring your bills for seed to the conservation office and indicate the acres and fields planted on a map. Henry County Conservation District encourages all producers to report cover crops to the FSA office located in the USDA Building. The cost share is 50% not to exceed \$500.00 per landowner.

**The cover crop shall be planted before November 1, 2023.** First come, first serve until funding is depleted. Spot checking will be done by Curtis Coombs, the Henry County Conservation District Technician. Funding subject to board approval. Payments will be approved at following board meeting.
